

Notional mission-level view of the four APL Precision Strike Mission Area (PSMA) strategic vectors working together. Continuous Universal Targeting is illustrated as sensors observing Red targets and relaying targeting information to Blue tactical platforms. Control Red Perception is illustrated as Blue airborne and surface ship jamming platforms achieving nonkinetic effects against Red airborne and surface targets. Air Dominance is illustrated as crewed and uncrewed airborne platforms working together to maintain air supremacy. Resilient Time-Critical Strike is illustrated as Blue hypersonic weapons attacking Red land and sea targets.
